Notes

Deadtone is digital noise project based in Cacak, Serbia.

The basic idea behind the project is to combine various elements of raw data manipulations and get to the point where composition sounds like a audio collapse made of tons of bad personal computers founded somewhere in the junk. Tracks can be described as chaotic, irritant, annoying, so it's the perfect material to get your neighbours pissed off.

Artwork [Cover] is product of Deadtone.

Editions limited to 30 copies.
